# E-SYSTEMS

## ABOUT

Founded in 2019, E-System Solutions emerged as a pioneering force in the realm of school management systems. Originating from the need to streamline administrative tasks and improve communication between stakeholders, E-Systems have become indispensable tools for educational institutions countrywide. What began as a humble endeavor has burgeoned into a countrywide entity renowned for its innovative technology and unwavering commitment to education. E-System's have undergone continuous refinement, incorporating advancements in technology to meet the evolving needs of educators, students, and parents. E-SYSTEM is an advanced school management system designed to streamline administrative processes, improve educational outcomes, and enhance communication between schools, students, parents, and staff. Our comprehensive solution integrates seamlessly with banking systems, offers an online grading system, supports bulk SMS, and incorporates embedded artificial intelligence educational tools. The journey has been marked by a relentless pursuit of excellence and a steadfast dedication to empowering educational institutions countrywide.

### The Software

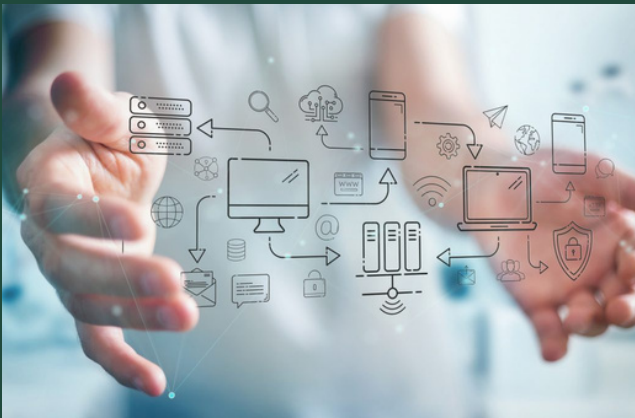

**What we are going to build you is a custom piece of web-based software.**

### This means:

- No IT company is needed
- Access the software from anywhere
- No worrying about backups
- One central place everyone can log into

# Mission and Vision.

---

## MISSION

To empower schools with the tools necessary to operate efficiently, enhance collaboration, and optimize student learning outcomes

---

## VISION

We envision a future where educational institutions can harness the power of technology to provide a personalized and enriching experience for students, educators, and administrators alike. creating a seamless educational experience, where administrative tasks are automated, data-driven insights inform decision-making, and communication flows effortlessly between all stakeholders. At its core, the philosophy driving E-Systems is a commitment to advancing education through innovation, efficiency, and collaboration.

# Why our system is much better

here are 4 benefits of using E-SYSTEM

100%

## Bank Integration

Our platform integrates seamlessly with all banks, allowing parents to conveniently pay school fees, and track transactions securely. With direct deposits and real-time transaction tracking, financial management becomes hassle-free.

100%

## Artificial Intelligence

At the heart of our system lies advanced artificial intelligence. Through AI algorithms, we personalize the learning experience for each student, catering to their unique strengths, weaknesses, and learning styles. Adaptive lesson plans, interactive quizzes, and assessments empower students to engage deeply with their studies and achieve academic excellence.

100%

## Accessibility

Our platform is accessible via both mobile and computer devices, ensuring that parents, teachers, and administrators can manage school-related tasks anytime, anywhere. Whether you're at home, in the office, or on the go, you have full control over school administration at your fingertips.

80%

## Bulk SMS Support

Communication is key in the education ecosystem. Our platform ensures instant dissemination of important information and updates to parents, teachers, and administrators through bulk SMS support. Stay informed and connected, no matter where you are.

# Proposed Timeline

1

Preparation

## 1. Initial Consultation and Needs Assessment

- Meet with school administrators to discuss requirements, goals, and expectations.
- Conduct a thorough assessment of existing systems and processes.
- Obtain approval to proceed with the project.

2

Integration

## 2. Integration and Testing (within first two weeks of every month)

- Develop the backend infrastructure for seamless bank integration and data management.
- Implement secure payment processing and transaction tracking functionalities.

3

Deployment

## 3. Training and Documentation

- Provide training sessions for administrators, teachers, and parents on using the system.
- Conduct a pilot test with a small group of users to identify any issues or areas for improvement.
- Gather feedback from users and make necessary adjustments to the system.

4

Evaluation and Optimization

## 4. Full Deployment

- Roll out the School Management E-SYSTEM to all stakeholders.
- Provide ongoing support and troubleshooting as needed.

## 5. Ongoing

- Regularly review system performance and user feedback.
- Identify opportunities for optimization and enhancement.
- Implement updates and new features to continuously improve the system.

# Proposed budget

Project and Initiative	Value	Percentage
Software Licensing and Subscription Fees (monthly)	Negotiable	100%
Customization and Configuration	Negotiable	100%
Training and Onboarding	free	100%
<b>Support and Maintenance:</b>	free	100%
<b>TOTAL</b>	upon agreed rate	100%

# partners and Future Projections

## FINANCIAL TARGETS

- Clients
- Subscriptions
- Digital Partnerships

## FUTURE PLANS FOR GROWTH

- New app development
- Optimization of current products
- Advance more on AI

## ADDITIONAL SOURCES OF REVENUE

- Customized app development
- Tiered subscriptions
